5 Year **Warranty**

## Combining Sophistication & Functionality

### Specifications

- 12VDC (powered from alarm panel)
- Connects to EC-i, ESX V2, ESL or Runner bus
- Hardwire up to 300m from control panel
- Direct fix or fits standard vertical flush box
- Mounting height: 1.2 to 1.5m
- Self calibrating when attached to backplate

The EC-KP is one of the most discrete alarm keypads available, pairing seamlessly with most light switch plates in your home or business. Customisable backlight & sleep options allow users to configure each keypad for rooms or hallways where low light, or no light is often essential.
