NOBO model

The NOBO electronic safe is a multipurpose model that offers all the functions demanded by hotels and tourist accommodation.

POLYVALENCE

NOBO provides the services demanded most in hotels. Its standard version and optional add-ons meet the security and functionality requirements of most hotels.

ACCESSORIES

Convenience and safety for your guests

NOBO offers a balance between convenience and safety; both being highly valued by guests.

Options for rental, RFID or iButton opening and auditing, among others, make NOBO a polyvalent safe for guests and owners of hotels and tourist accommodation.

specific project options

- Left opening door
- Card opening
- Change of colour, RAL chart
- Opening by iButton

optional accessories

- Multi-zone socket inside, option with USB
- Electrical power supply. Keeps batteries powered for use during power cuts

* iButton is an alternative emergency opening method to the traditional mechanical lock.

The iButton system is a more secure option, as it cannot be duplicated, unlike physical keys. Additionally, the administrator can cancel and/or reprogramme the opening permissions for an iButton-equipped safe.

Safes with iButton are especially designed for large establishments and cruise ships.
