SPECIFICATIONS

Elsafe Service Tools

A service tablet or a laptop is used with an interface cable and a unique service code. The service tool is also utilizing a software called Safelink for Windows for synchronizing programming between the service tools and safes. For instance, to securely override, uploading programs, change settings or transfer data to the electronic safes.

Power Outlets

Optional internal power outlet in different types (EU, UK, US or Universal with USB).

PinKey

PinKey is a compact electronic PIN code protected key to securely override and service Elsafe safes. This service tool must be combined with a USB docking cable and the Admin software to commission, service open a safe and print out events.
